TONIX PHARMACEUTICALS HOLDING CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2014 AND 2013 (UNAUDITED)

NOTE 1 – BUSINESS

Tonix Pharmaceuticals Holding Corp., through its wholly owned subsidiary Tonix Pharmaceuticals, Inc., or Tonix Sub, is a pharmaceutical company dedicated to the identification and development of novel pharmaceutical products for common yet challenging medical disorders.

The consolidated financial statements include the accounts of Tonix Pharmaceuticals Holding Corp. and its wholly owned subsidiaries, Tonix Sub, Krele LLC, Tonix Pharmaceuticals (Canada), Inc., and Tonix Pharmaceuticals (Barbados), Ltd. (collectively hereafter referred to as the “Company” or “Tonix”).

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

Interim Financial Statements

The unaudited condensed consolidated interim financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”) for interim financial information and the instructions to Form 10-Q and Rule 8-03 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included.

The condensed consolidated balance sheet as of December 31, 2013 contained herein has been derived from audited financial statements.

Operating results for the three and six months ended June 30, 2014 are not necessarily indicative of results that may be expected for the year ending December 31, 2014. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the year ended December 31, 2013 included in the Company’s Annual Report on Form 10-K, filed with the Securities and Exchange Commission (“SEC”) on March 28, 2014.

Recent Accounting Pronouncement Adopted

During the quarter ended June 30, 2014, the Company adopted Accounting Standards Update (ASU) No. 2014-10, “Development Stage Entities (Topic 915): Elimination of Certain Financial Reporting Requirements, Including an Amendment to Variable Interest Entities Guidance in Topic 810, Consolidation”, which was issued in June 2014. The ASU is effective for annual reporting periods beginning after December 15, 2014 (and interim periods therein), with early adoption allowed. The amendments in this ASU eliminate the concept of a development stage entity from GAAP and remove the related incremental financial reporting requirements. Accordingly, the Company is no longer presenting cumulative inception-to-date along with their current period amounts in its statements of operations and cash flows.

Risks and Uncertainties

The Company's primary efforts are devoted to conducting research and development for the treatment of disorders of the central nervous system. The Company has experienced net losses and negative cash flows from operations since inception and expects these conditions to continue for the foreseeable future. Further, the Company does not have any commercial products available for sale and has not generated revenues and there is no assurance that if approval of their products is received that the Company will be able to generate cash flow to fund operations. In addition, there can be no assurance that the Company's research and development will be successfully completed or that any product will be approved or commercially viable.

TONIX PHARMACEUTICALS HOLDING CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2014 AND 2013 (UNAUDITED)

At June 30, 2014, the Company had working capital of approximately \$42.4 million, after raising approximately \$40.7 million through the sale of common stock in an underwritten public offering and approximately \$4.9 million upon the exercise of previously issued warrants. In addition, in July 2014, the Company raised approximately \$7.2 million through the sale of common stock in a registered direct public offering (see Note 8). Management believes that the Company has sufficient funds to meet its research and development and other funding requirements for at least the next 12 months. The Company expects that cash used in operations for research and development will increase significantly over the next several years. In the event the funding obtained is not sufficient to complete the development and commercialization of its current product candidates, the Company intends to raise additional funds through equity or debt financing. If the Company is unsuccessful in raising additional financing, it will need to reduce costs and operations in the future.

Use of estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include the useful life of fixed assets, assumptions used in the fair value of stock-based compensation and other equity instruments, and the percent of completion of research and development contracts.

Research and development costs

The Company outsources its research and development efforts and expenses these costs as incurred, including the cost of manufacturing products for testing, as well as licensing fees and costs associated with planning and conducting clinical trials. The value ascribed to patents and other intellectual property acquired has been expensed as research and development costs, as such property related to particular research and development projects and had no alternative future uses (see Note 6).

Income taxes

Income tax provisions or benefits for interim periods are computed based on the Company's estimated annual effective tax rate. Based on the Company's historical losses and its expectation of continuation of losses for the foreseeable future, the Company has determined that it is more likely than not that deferred tax assets will not be realized and, accordingly, has provided a full valuation allowance. As the Company anticipates or anticipated that its net deferred tax assets at December 31, 2014 and 2013 would be fully offset by a valuation allowance, there is no federal or state income tax benefit for the periods ended June 30, 2014 and 2013 related to losses incurred during such periods.

Per share data

Basic and diluted net loss per common share is calculated by dividing net loss by the weighted average number of outstanding shares of common stock.

As of June 30, 2014 and 2013, there were outstanding warrants to purchase an aggregate of 1,975,431 and 1,232,400 shares, respectively, of the Company's common stock (see Note 5). In addition, the Company has issued to employees and directors, options to acquire shares of the Company's common stock of which 905,100 and 376,500 were outstanding at June 30, 2014 and 2013, respectively (see Note 4). In computing diluted net loss per share for the three and six months ended June 30, 2014 and 2013, no effect has been given to such options and warrants as their effect would be anti-dilutive.

NOTE 3 – JANUARY 2014 FINANCING

On January 24, 2014, the Company entered into an underwriting agreement with Roth Capital Partners, LLC, as representative of several underwriters (collectively, the "Underwriters"), relating to the issuance and sale of 2,898,550 shares of its common stock in an underwritten public offering (the "January 2014 Financing"). The public offering price for each share of common stock was \$15.00. The Company granted the Underwriters a 45-day option to purchase up to an additional 434,782 shares of Common Stock to cover over-allotments, if any.

TONIX PHARMACEUTICALS HOLDING CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2014 AND 2013 (UNAUDITED)

The January 2014 Financing closed on January 29, 2014. The Underwriters purchased the shares at a six-percent discount to the public offering price, for an aggregate discount of approximately \$2.6 million (or \$0.90 per share). The Company also paid offering expenses of approximately \$0.2 million. The Company received net proceeds of approximately \$40.7 million. The over-allotment option expired unexercised.

NOTE 4 – SHARE BASED COMPENSATION

2012 Incentive Stock Option Plan

On April 16, 2012, the Company's stockholders approved the 2012 Incentive Stock Option Plan (the "2012 Plan"). The 2012 Plan provides for the issuance of options to purchase up to 200,000 shares of the Company's common stock to officers, directors, employees and consultants of the Company. Under the terms of the 2012 Plan, the Company may issue incentive stock options as defined by the Internal Revenue Code of 1986, as amended (the "Code") to employees of the Company and may also issue nonstatutory options to employees and others. The Company's board of directors ("Board of Directors") determines the exercise price, vesting and expiration period of the grants under the 2012 Plan. However, the exercise price of an incentive stock option may not be less than 110% of fair value of the common stock at the date of the grant for a 10% or more shareholder and 100% of fair value for a grantee who is not a 10% shareholder. The fair value of the common stock is determined based on quoted market price or in absence of such quoted market price, by the Board of Directors in good faith. Additionally, the vesting period of the grants under the 2012 Plan may not be more than five years and expiration period not more than ten years. The Company reserved 200,000 shares of its common stock for future issuance under the terms of the 2012 Plan.

On May 9, 2012, 175,000 options had been granted under the 2012 Plan. Of such options, 25,000 were cancelled and 150,000 were outstanding at June 30, 2014 with an exercise price of \$30.00, a 10 year life and fair value of \$23.50.

On February 12, 2013, the 2012 Plan was amended and restated to increase the number of shares reserved under the plan to 550,000. On February 12, 2013, 226,500 options were granted under the 2012 Plan (all of which were outstanding at June 30, 2014) with an exercise price of \$10.20, a 10 year life and fair value of \$7.83.

On February 11, 2014, 173,500 options were granted under the 2012 Plan (all of which were outstanding at June 30, 2014) with an exercise price of \$15.88, a 10 year life and fair value of \$11.52.

2014 Incentive Stock Plan

On June 9, 2014, the Company's stockholders approved the Tonix Pharmaceuticals Holdings Corp. 2014 Stock Incentive Plan (the "2014 Plan" and together with the 2012 Plan, the "Plans"). Under the terms of the 2014 Plan, the Company may issue (1) stock options (incentive and nonstatutory), (2) restricted stock, (3) stock appreciation rights, or SARs, (4) restricted stock units, or RSUs, (5) other stock-based awards, and (6) cash-based awards. The 2014 Plan provides for the issuance of up to 1,800,000 shares of common stock, provided, however, that, of the aggregate number of 2014 Plan shares authorized, no more than 200,000 of such shares may be issued pursuant to stock-settled awards other than options (that is, restricted stock, RSUs, SARs, performance awards, other stock-based awards and dividend equivalent awards, in each case to the extent settled in shares of common stock). The Board of Directors determines the exercise price, vesting and expiration period of the grants under the 2014 Plan. However, the exercise price of an incentive stock option may not be less than 110% of fair value of the common stock at the date of the grant for a 10% or more shareholder and 100% of fair value for a grantee who is not a 10% shareholder. The fair value of the common stock is determined based on quoted market price or in absence of such quoted market price, by the Board of Directors in good faith. Additionally, the vesting period of the grants under the 2014 Plan may not be more than five years and expiration period not more than ten years. The Company reserved 1,800,000 shares of its common stock for future issuance under the terms of the 2014 Plan.

On June 17, 2014, 355,100 options were granted under the 2014 Plan (all of which were outstanding at June 30, 2014) with an exercise price of \$9.87, a 10 year life and fair value of \$8.76.

TONIX PHARMACEUTICALS HOLDING CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2014 AND 2013 (UNAUDITED)

General

The Company measures the fair value of stock options on the date of grant, based on a Binomial option pricing model using certain assumptions discussed in the following paragraph, and the closing market price of the Company's common stock on the date of the grant. Stock options granted pursuant to the Plans vest 1/3rd 12 months from the date of grant and 1/36th each month thereafter for 24 months and expire ten years from the date of grant. Share-based compensation expense related to awards is amortized over the applicable vesting period using the straight-line method.

The assumptions used in the valuation of stock options granted during the six months ended June 30, 2014 and 2013 were as follows:

	Six Months Ended June 30, 2014	Six Months Ended June 30, 2013
Risk-free interest rate	2.19% to 2.27%	2.02%
Expected term of option	6.0 years	6.0 years
Expected stock price volatility	97.56% to 100.73%	99.96%
Expected dividend yield	\$ 0.0	\$ 0.0

The risk-free interest rate is based on the yield of Daily U.S. Treasury Yield Curve Rates with terms equal to the expected term of the options as of the grant date. The expected term of options is determined using the simplified method, as provided in an SEC Staff Accounting Bulletin, and the expected stock price volatility is based on comparable companies' historical stock price volatility since the Company does not have sufficient historical exercise or volatility data because its equity shares have been publicly traded for only a limited period of time.

Share-based compensation expense of \$651,323 and \$1,203,924 was recognized for the three and six month periods ended June 30, 2014, respectively; and \$441,572 and \$833,895 for the three and six month periods ended June 30, 2013, respectively.

As of June 30, 2014, the Company had approximately \$6.8 million of total unrecognized compensation cost related to non-vested awards granted under the Plans, which the Company expects to recognize over a weighted average period of 2.38 years.

A summary of the stock option activity and related information for the Plans for the six months ended June 30, 2014 is as follows:

	Shares	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 1, 2014	376,500	\$ 18.09	8.81	\$
Grants	528,600	\$ 11.84	9.85	\$
Exercised	-			
Forfeitures or expirations	-			
Outstanding at June 30, 2014	905,100	\$ 14.44	9.21	\$ 2,532,527
Vested and expected to vest at June 30, 2014	905,100	\$ 14.44	9.21	\$ 2,532,527
Exercisable at June 30, 2014	204,833	\$ 20.27	8.23	\$ 417,767

TONIX PHARMACEUTICALS HOLDING CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2014 AND 2013 (UNAUDITED)

2014 Employee Stock Purchase Plan

On June 9, 2014, the Company's stockholders approved the Tonix Pharmaceuticals Holdings Corp. 2014 Employee Stock Purchase Plan (the "2014 ESPP"). The 2014 ESPP allows eligible employees to purchase up to an aggregate of 300,000 shares of the Company's common stock. Under the 2014 ESPP, on the first day of each offering period, each eligible employee for that offering period has the option to enroll for that offering period, which allows the eligible employees to purchase shares of the Company's common stock at the end of the offering period. Each participant will be permitted to purchase a number of shares determined by dividing the employee's accumulated payroll deductions for the offering period by the applicable purchase price, which is equal to 85 percent of the fair market value of our common stock at the beginning or end of each offering period, whichever is less. A participant must designate in his or her enrollment package the percentage (if any) of compensation to be deducted during that offering period for the purchase of stock under the 2014 ESPP, subject to the statutory limit under the Code. As of June 30, 2014, there were 300,000 shares available for future issuance under the 2014 ESPP.

NOTE 5 – STOCK WARRANTS

The following table summarizes information with respect to outstanding warrants to purchase common stock of the Company at June 30, 2014:

Exercise Price	Number Outstanding	Expiration Date
\$ 4.25	1,150,655	August 2018
12.00	456,009	December 2017 to February 2018
20.00	14,538	January 2015
25.00	354,229	January 2017 to February 2019
	<u>1,975,431</u>	

During the six months ended June 30, 2014, the Company issued an aggregate of 1,150,475 shares of its common stock upon the exercise of warrants at \$4.25 per share.

NOTE 6 – RELATED PARTY TRANSACTIONS

Tonix previously entered into a consulting agreement with Lederman & Co., LLC ("Lederman & Co"), a company controlled by Dr. Seth Lederman, our Chief Executive Officer and Chairman of the Board. Total expenses paid under this agreement were \$nil and \$37,723 during the three and six month periods ended June 30, 2014, respectively, and \$62,500 and \$125,000 during the three and six month periods ended June 30, 2013, respectively. The agreement was terminated on February 11, 2014 and replaced with the employment agreement entered into on that date (see Note 7).

On July 31, 2013, the Company sold two promissory notes in the principal face amounts of \$150,000 and \$50,000 to Lederman & Co and Eli Lederman, respectively, in exchange for \$150,000 and \$50,000, respectively. On August 1, 2013, the Company sold a promissory note in the principal face amount of \$80,000 to Lederman & Co in exchange for \$80,000. The notes are payable on demand at any time after one year from issuance and bear no interest, and are included in current liabilities on the condensed consolidated balance sheets at June 30, 2014 and December 31, 2013. On July 31, 2014 and August 1, 2014, the Company repaid \$200,000 and \$80,000, respectively, of promissory notes to related parties.

Intellectual property acquired

On March 18, 2014, Tonix Barbados entered into an agreement with Leder Laboratories, Inc. ("Leder"), to acquire intellectual property related to novel smallpox vaccines. As consideration, \$125,000 was paid in cash and 25,000 shares of the Company's common stock valued at \$303,750 (\$12.15 per share, which was the closing price of the common shares on the date of the transaction) were issued to Leder.

TONIX PHARMACEUTICALS HOLDING CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2014 AND 2013 (UNAUDITED)

On March 18, 2014, Tonix Barbados entered into an agreement with Starling Pharmaceuticals, Inc. (“Starling”), to acquire intellectual property related to radio and chemo protective agents. As consideration, \$125,000 was paid in cash and 25,000 shares of the Company’s common stock valued at \$303,750 (\$12.15 per share, which was the closing price of the common shares on the date of the transaction) were issued to Starling.

Seth Lederman, the Company’s Chairman and Chief Executive Officer, is the Chairman, CEO and majority owner (through majority-owned entities) of Starling and Leder.

NOTE 7 – COMMITMENTS

Research and Development Contracts

The Company has entered into contracts with various contract research organizations with outstanding commitments aggregating approximately \$7.3 million at June 30, 2014 for future work to be performed.

Operating leases

On February 11, 2014, the Company entered into a lease amendment and expansion agreement, whereby the Company agreed to lease additional premises for office space, commencing May 1, 2014 and expiring on April 30, 2019. In connection therewith, the original letter of credit was increased by \$72,354 to \$132,417 and the Company deposited an additional \$72,354 into the restricted cash account maintained at the bank that issued the letter of credit.

On April 28, 2014, the Company entered into a lease for approximately 3,578 square feet of office space in San Jose, California, whereby the Company agreed to lease premises, commencing August 1, 2014 and expiring on October 31, 2018 (51 months). In connection therewith, the Company paid a security deposit of \$44,546.

Future minimum lease payments under these two agreements are as follows:

Year Ending December 31,	
2014	\$ 173,206
2015	\$ 420,120
2016	\$ 445,890
2017	\$ 459,295
2018 and thereafter	\$ 540,782
	\$ 2,039,293

Lederman Employment Agreement

On February 11, 2014, the Company entered into an employment agreement (the “Agreement”) with Dr. Seth Lederman (“Lederman”) to continue to serve as our President, Chief Executive Officer and Chairman of the board of directors of the Company. Previously, the Company entered into a consulting agreement with Lederman & Co, pursuant to which Lederman received compensation for serving as the Company’s President and Chief Executive Officer. On February 11, 2014, the consulting agreement was terminated.

The Agreement, which has an initial term of one year and automatically renews for successive one year terms unless either party delivers written notice not to renew at least 60 days prior to the end of the current term, provides for various payment and benefits to Lederman in the event Lederman’s employment is terminated without cause (as defined therein), Lederman resigns for Good Reason (as defined therein) or in the event employment is terminated as a result of death or permanent disability.

TONIX PHARMACEUTICALS HOLDING CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2014 AND 2013 (UNAUDITED)

Defined Contribution Plan

Approved by the Company's Board of Directors on March 3, 2014, effective April 1, 2014, the Company established a qualified defined contribution plan (the "401(k) Plan") pursuant to Section 401(k) of the Code, whereby all eligible employees may participate. Participants may elect to defer a percentage of their annual pretax compensation to the 401(k) plan, subject to defined limitations. The Company is required to make contributions to the 401(k) Plan equal to 100 percent of each participant's pretax contributions of up to 19 percent of his or her eligible compensation, and the Company is also required to make a contribution equal to six percent of each participant's salary, on an annual basis, subject to limitations under the Code. For the three and six months ended June 30, 2014, the Company charged operations \$30,664 for contributions under the 401(k) Plan.

NOTE 8 – SUBSEQUENT EVENT

On July 11, 2014, the Company entered into a Placement Agent Agreement with Roth Capital Partners, LLC relating to the sale of 657,000 shares of its common stock in a registered direct public offering at a price of \$11.90 per share. The registered direct offering closed on July 16, 2014 and the Company received net proceeds of approximately \$7.2 million, after deducting placement agent fees and offering expenses of approximately \$0.6 million.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis of Financial Condition and Results of Operations includes a number of forward-looking statements that reflect Management's current views with respect to future events and financial performance. You can identify these statements by forward-looking words such as "may," "will," "expect," "anticipate," "believe," "estimate" and "continue," or similar words. Those statements include statements regarding the intent, belief or current expectations of us and members of our management team as well as the assumptions on which such statements are based. Prospective investors are cautioned that any such forward-looking statements are not guarantees of future performance and involve risk and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statements.

Readers are urged to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the Securities and Exchange Commission. Important factors currently known to Management could cause actual results to differ materially from those in forward-looking statements. We undertake no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes in the future operating results over time. We believe that our assumptions are based upon reasonable data derived from and known about our business and operations. No assurances are made that actual results of operations or the results of our future activities will not differ materially from our assumptions. Factors that could cause differences include, but are not limited to, expected market demand for our products, fluctuations in pricing for materials, and competition.

Business Overview

We are a clinical-stage pharmaceutical company dedicated to the development of novel prescription products for common yet challenging medical disorders. Our lead drug development programs are directed toward conditions affecting the central nervous system, or CNS. Our pipeline of product candidates is led by TNX-102 SL (cyclobenzaprine HCl sublingual tablets), which is in late-stage clinical development as a potential treatment for fibromyalgia, or FM, and represents a new class of medication for this disorder. We expect to report topline results from our ongoing Phase 2b/3 trial of TNX-102 SL in FM, potentially the first of two pivotal trials needed to support marketing approval in this indication, in the fourth quarter of 2014. TNX-102 SL is also in development as a potential treatment for post-traumatic stress disorder, or PTSD, and we expect to commence a Phase 2 trial for this indication in the fourth quarter of 2014. We are also developing TNX-201 (isometheptene mucate single isomer) as a potential treatment for episodic tension-type headache, or ETTH. We plan to file an Investigational New Drug, or IND, application in the fourth quarter of 2014 for clearance to commence a Phase 1 trial of TNX-201 for this indication. We expect to commence the Phase 1 trial in the first quarter of 2015. We hold worldwide commercialization rights to TNX-102 SL and TNX-201. Our pipeline also includes preclinical programs for the treatment of alcohol abuse and dependence, and for protection from smallpox as well as from radiation and chemical exposure.

TNX-102 SL

Our lead product candidate, TNX-102 SL, is a small, rapidly disintegrating tablet containing cyclobenzaprine, or CBP, for sublingual administration. CBP is the active pharmaceutical ingredient of two widely prescribed products, or CBP products, that are approved for acute use only. We are developing TNX-102 SL as a bedtime therapy for the management of FM and PTSD, which are chronic indications for which CBP products are not approved. We believe that three key aspects of TNX-102 SL distinguish it from CBP products: (1) it is being developed at a dose level well below the lowest marketed doses of CBP products; (2) it is dosed daily at bedtime under the tongue for rapid sublingual absorption, whereas CBP products are swallowed and provide absorption in the small intestine; and (3) it is being developed with a safety profile suitable for chronic use, whereas CBP products are not approved for more than two to three weeks of use. We expect that any applications we submit to the Food and Drug Administration, or FDA, for approval of TNX-102 SL will be submitted under Section 505(b)(2) of the Federal Food, Drug, and Cosmetic Act, or FDCA, which we believe will allow for a shorter timeline of clinical and non-clinical development as compared to that needed to fulfill the requirements of Section 505(b)(1), under which new chemical entities, or NCEs, that have never been approved in the United States, are generally developed to meet the FDA's new drug registration requirements.

We have conducted several clinical and non-clinical pharmacokinetic trials of TNX-102 sublingual formulations, which we believe support the development of TNX-102 SL as a novel therapeutic product for FM and PTSD. Results from these trials demonstrate a number of potentially advantageous characteristics as compared to marketed CBP products, which are not approved for these indications. For example, our Phase 1 comparative trials showed that TNX-102 SL results in faster systemic absorption and significantly higher plasma levels of CBP in the first hour following administration relative to oral CBP tablets. TNX-102 SL was generally well-tolerated, with no serious adverse events reported in these studies. Some subjects experienced transient numbness on the tongue after TNX-102 SL administration, and other side-effects reported were similar to those reported with approved CBP products.

TNX-102 SL – Fibromyalgia Program

We are developing TNX-102 SL for the treatment of FM under an IND cleared by the FDA in 2011. At an End-of-Phase 2/Pre-Phase 3 meeting with the FDA in February 2013, we discussed the design of our clinical program, including the acceptability of the pivotal study design and the proposed registration plan, to support the approval of TNX-102 SL for the management of FM. On the basis of our discussions with the FDA, we believe that positive results from two adequate, well-controlled safety and efficacy studies and the establishment of long-term safety for chronic use, as evidenced by results from open-label safety exposure studies per FDA requirements, would support the approval of TNX-102 SL for the management of FM.

Following our meeting with the FDA, in September 2013, we commenced our 200-patient, 17-U.S. site, randomized, double-blind, placebo-controlled Phase 2b/3 BESTFIT clinical trial, or the BESTFIT trial. In the BESTFIT trial, patients with FM are being treated with either TNX-102 SL 2.8 mg or placebo sublingual tablets at bedtime daily for 12 weeks. The primary outcome measure of the BESTFIT trial is the mean change in week 12 average daily pain intensity from baseline on the 11-point Numeric Rating Scale, or NRS, using a daily telephonic diary. This endpoint is similar to that utilized in clinical trials of drug products currently approved for use in FM. We are also collecting information on other outcome measures, including NRS scores at other time points, the revised Fibromyalgia Impact Questionnaire, and the Patient Global Impression of Change. In May 2014, we announced the completion of patient enrollment into the BESTFIT trial. We expect to report topline results from the BESTFIT trial in the fourth quarter of 2014.

In December 2013, we commenced Study F203, a 12-month open-label extension study of TNX-102 SL in patients who have completed the BESTFIT study. The goal of Study F203 is to obtain the prerequisite 6- and 12-month safety exposure data to support the NDA filing.

TNX-102 SL – Post-Traumatic Stress Disorder Program

We are also developing TNX-102 SL for the management of PTSD under an IND cleared by the FDA in June 2014. We expect to commence a 220-patient, approximately 25-U.S. site, randomized, double-blind, placebo-controlled, Phase 2 trial of TNX-102 SL in subjects with military-related PTSD, or the AtEase trial, in the fourth quarter of 2014. The AtEase trial is designed to study the safety and efficacy of two doses of TNX-102 SL administered once daily at bedtime. The objective of the AtEase trial is to evaluate the efficacy of TNX-102 SL 2.8 mg as compared to placebo sublingual tablet following eight weeks of treatment using the Clinician-Administered PTSD Scale.

If the results of the AtEase trial are positive, we intend to meet with the FDA to finalize the design of the registration studies that would be required to support approval of an NDA for this indication. Based on our communications with the FDA to date, we believe positive results from two adequate, well-controlled efficacy and safety studies and long-term (6 and 12 month) safety exposure data will be sufficient to support FDA approval for this indication. We expect that we will be able to use the long-term safety exposure data generated by our clinical development of TNX-102 SL in FM to supplement the long-term safety exposure data required for the PTSD NDA.

TNX-201 – Episodic Tension-Type Headache Program

TNX-201 is a single isomer of isometheptene mucate, or IMH, and is under development as a treatment for ETTH, an indication believed to affect approximately 20% of the global adult population. Although currently not approved for any indication, IMH has an extensive history of use as a prescription pharmaceutical in the U.S. as a mixture of two mirror-image isomers, or IMH enantiomers, also known as a racemic mixture. Racemic IMH has been marketed as Octin® for conditions including tension and vascular headache. In addition, racemic IMH has been marketed in combination products for the relief of tension and vascular headaches (examples include Midrin® and MigraTen®). Based on our evaluation studies, we believe that one of the IMH enantiomers, which we are developing as TNX-201, is primarily responsible for the efficacy associated with the racemic mixture in the treatment of headache, and that the other IMH isomer may be associated with greater safety and tolerability risks. As a result, we believe that TNX-201 may have an improved clinical profile as compared to the racemic mixture for headache indications. According to the FDA's Stereoisomeric Drugs Development Policy, the development of a single enantiomer of a racemic drug is particularly desirable in cases in which one enantiomer has a toxic or undesirable pharmacologic effect and the other does not.

We held a pre-IND meeting with the FDA in January 2014 to discuss the regulatory pathway for the development of TNX-201 for the treatment of ETTH. Based on that meeting, we believe that the initial IND for TNX-201 will not require any additional nonclinical data to support a first-in-man Phase I comparative pharmacokinetic and safety study, which we expect to commence in the first quarter of 2015. Although the development of TNX-201 will be based on the available information on racemic IMH, approval of any NDA will be pursuant to Section 505(b)(1) of the FDCA.

Additional Product Candidates

We also have a pipeline of other product candidates, including TNX-301. TNX-301 is a fixed dose combination drug product, or CDP, containing two FDA-approved drugs, disulfiram and selegiline. We intend to develop TNX-301 CDP under Section 505(b)(2) of the FDCA as a potential treatment for alcohol abuse and dependence, and plan to begin formulation work on TNX-301 later in the second half of 2014. In addition, we recently acquired rights to intellectual property on two biodefense technologies: one relating to the development of novel smallpox vaccines, and the other to the development of protective agents against radiation exposure. We plan to perform non-clinical research and development on these programs later in the second half of 2014. The FDA Animal Efficacy Rule provides a mechanism for product licensure when human efficacy studies are not feasible or ethical. As a result, the licensure of these biodefense products in the United States may not require human efficacy studies, which we believe will reduce our development costs and risks compared to the development of other NCEs or new biologic candidates.

Current Operating Trends

Our current research and development efforts are focused on developing our lead product, TNX-102 SL, but we also expend increasing effort on our other pipeline programs, including TNX-201. Our research and development expenses consist of manufacturing work and the cost of drug ingredients used in such work, fees paid to consultants for work related to clinical trial design and regulatory activities, fees paid to providers for conducting various clinical studies as well as for the analysis of the results of such studies, and for other medical research addressing the potential efficacy and safety of our drugs. We believe that significant investment in product development is a competitive necessity, and we plan to continue these investments in order to be in a position to realize the potential of our product candidates and proprietary technologies.

We are currently conducting our BESTFIT study, a Phase 2b/3 clinical trial of TNX-102 SL in FM. We also plan to begin a Phase 2 trial of TNX-102 SL in PTSD in the fourth quarter of 2014, as well as advance TNX-201 for ETTH into clinical studies in the first quarter of 2015. Clinical trials can be very expensive. If these and additional necessary clinical trials are successful, we plan to prepare and submit applications to the FDA for marketing approval for our drug candidates. This process entails significant costs. As a result of these and other factors, we expect our research and development expenses to increase significantly over the next 12 to 24 months.

We expect that a larger percentage of our research and development expenses in the future will be incurred in support of our current and future preclinical and clinical development programs rather than technology development. These expenditures are subject to numerous uncertainties relating to timing and cost to completion. We test compounds in numerous preclinical studies for safety, toxicology and efficacy. At the appropriate time, subject to the approval of regulatory authorities, we expect to conduct early-stage clinical trials for each drug candidate. We anticipate funding these trials ourselves, and possibly with the assistance of federal grants. As we obtain results from trials, we may elect to discontinue or delay clinical trials for certain products in order to focus our resources on more promising products. Completion of clinical trials may take several years, and the length of time generally varies substantially according to the type, complexity, novelty and intended use of a product candidate.

The commencement and completion of clinical trials for our products may be delayed by many factors, including lack of efficacy during clinical trials, unforeseen safety issues, slower than expected patient recruitment, or government delays. In addition, we may encounter regulatory delays or rejections as a result of many factors, including results that do not support the intended safety or efficacy of our product candidates, perceived defects in the design of clinical trials and changes in regulatory policy during the period of product development. As a result of these risks and uncertainties, we are unable to accurately estimate the specific timing and costs of our clinical development programs or the timing of material cash inflows, if any, from our product candidates. Our business, financial condition and results of operations may be materially adversely affected by any delays in, or termination of, our clinical trials or a determination by the FDA that the results of our trials are inadequate to justify regulatory approval, insofar as cash in-flows from the relevant drug or program would be delayed or would not occur.

Results of Operations (in thousands, except share data)

We anticipate that our results of operations will fluctuate for the foreseeable future due to several factors, such as the progress of our research and development efforts and the timing and outcome of regulatory submissions. Due to these uncertainties, accurate predictions of future operations are difficult or impossible to make.

Three Months Ended June 30, 2014 Compared to Three Months Ended June 30, 2013

Revenues and Cost of Goods Sold. We had no revenues or cost of goods sold during the three month periods ended June 30, 2014 and 2013.

Research and Development Expenses. Research and development expenses for the three months ended June 30, 2014 were \$4,075, an increase of \$3,131, or 333%, from \$944 for the three months ended June 30, 2013. This increase is primarily due to increased development work related to TNX-102 SL, including manufacturing and human safety and efficacy studies. During the three months ended June 30, 2014, we incurred \$762, \$1,497 and \$374 in manufacturing costs, clinical activity costs, and non-clinical activity costs, respectively, as compared to \$213, \$373 and \$99 in the same period last year, respectively. Beginning in 2014, we began classifying certain salaries, bonuses, and stock based compensation to research and development expenses based on a change in the individuals' responsibilities. Included in the three months ended June 30, 2014 was \$366 related to individuals that for the comparative period in 2013, were considered part of general and administrative expenses.

General and Administrative Expenses. General and administrative expenses for the three months ended June 30, 2014 were \$1,974, an increase of \$832, or 73%, from \$1,142 incurred in the three months ended June 30, 2013. This increase is primarily due to increases in payroll related expenses, travel, meals, and entertainment costs, professional services, and other expenses, offset by a decrease in insurance.

Payroll related expenses increased to \$926 for the three months ended June 30, 2014 from \$617 for the three months ended June 30, 2013, an increase of \$309, or 50%. We incurred \$548 in stock based compensation in connection with the vesting of stock options issued to board members, officers and employees in the three months ended June 30, 2014 as compared to \$442 in stock based compensation in the three months ended June 30, 2013. The increase in cash payroll related costs of \$203 was primarily a result of annual salary increases and added personnel, net with classification of wages and benefits related to research and development from general and administrative expenses.

Travel, meals and entertainment costs for the three months ended June 30, 2014 were \$113, an increase of \$26, or 30%, from \$87 incurred during the three months ended June 30, 2013. The increase in travel, meals and entertainment costs was primarily related to investor relations activities. Rent for the three months ended June 30, 2014 and 2013 totaled \$64 and \$29, respectively. In 2014, we increased the size of our corporate headquarters in New York and opened a satellite office in California. Depreciation expense for the three months ended June 30, 2014 and 2013 totaled \$5 and \$4, respectively. Office and other administrative expenses totaled \$355 for the three months ended June 30, 2014, an increase of \$218, or 159%, over the expenses of \$137 for the same period last year. The increase was primarily due to increases in securities trading expenses, conventions, dues and subscriptions and business tax costs, offset by decreases in insurance costs.

Professional services for the three months ended June 30, 2014 totaled \$510, an increase of \$241, or 90%, over the \$269 recognized for the three months ended June 30, 2013. Of professional services, legal fees totaled \$140 for the three months ended June 30, 2014, a decrease of \$2, or 1%, from \$142 incurred for the three months ended June 30, 2013. Investor and public relations fees incurred in the three months ended June 30, 2014 were \$275, an increase of \$174, or 172%, from \$101 incurred in the three months ended June 30, 2013. Accounting fees incurred in the three months ended June 30, 2014 and 2013 amounted to \$46 and \$25, respectively. Consulting fees and other professional fees totaled \$48 for the three months ended June 30, 2014, an increase of \$47 from \$1 for the three months ended June 30, 2013. Other professional fees include human resources, finance and corporate consultants.

Net Loss. As a result of the foregoing, the net loss for the three months ended June 30, 2014 was \$6,044, compared to a net loss of \$2,086 for the three months ended June 30, 2013.

Six Months Ended June 30, 2014 Compared to Six Months Ended June 30, 2013

Revenues and Cost of Goods Sold. We had no revenues or cost of goods sold during the six month periods ended June 30, 2014 and 2013.

Research and Development Expenses. Research and development expenses for the six months ended June 30, 2014 were \$7,625, an increase of \$5,940, or 353%, from \$1,685 for the six months ended June 30, 2013. This increase is primarily due to increased development work related to TNX-102 SL, including manufacturing and human safety and efficacy studies. During the six months ended June 30, 2014, we incurred \$1,068, \$2,469 and \$725 in manufacturing costs, clinical activity costs, and non-clinical activity costs, respectively, as compared to \$603, \$386 and \$141 in the same period last year, respectively. During the six months ended June 30, 2014, we acquired \$858 of intellectual property rights as compared to \$nil in the same period last year. In addition, beginning in 2014, we began classifying certain salaries, bonuses, and stock based compensation to research and development expenses based on a change in the individuals' responsibilities. Included in the six months ended June 30, 2014 was \$550 related to individuals that for the comparative period in 2013, were considered part of general and administrative expenses.

General and Administrative Expenses. General and administrative expenses for the six months ended June 30, 2014 were \$3,593, an increase of \$1,191, or 50%, from \$2,402 incurred in the six months ended June 30, 2013. This increase is primarily due to increases in payroll related expenses, travel, meals, and entertainment costs, professional services, and other expenses, offset by a decrease in insurance.

Payroll related expenses increased to \$1,653 for the six months ended June 30, 2014 from \$1,178 for the six months ended June 30, 2013, an increase of \$475, or 40%. We incurred \$1,025 in stock based compensation in connection with the vesting of stock options issued to board members, officers and employees in the six months ended June 30, 2014 as compared to \$834 in stock based compensation in the six months ended June 30, 2013. The increase in cash payroll related costs of \$284 was primarily a result of annual salary increases and added personnel, net with classification of wages and benefits related to research and development from general and administrative expenses.

Travel, meals and entertainment costs for the six months ended June 30, 2014 were \$238, an increase of \$106, or 80%, from \$132 incurred during the three months ended June 30, 2013. The increase in travel, meals and entertainment costs was primarily related to investor relations activities. Rent for the six months ended June 30, 2014 and 2013 totaled \$103 and \$57, respectively. In 2014, we increased the size of our corporate headquarters in New York and opened a satellite office in California. Depreciation expense for the six months ended June 30, 2014 and 2013 totaled \$9 and \$8, respectively. Office and other administrative expenses totaled \$552 for the six months ended June 30, 2014, an increase of \$296, or 116%, over the expenses of \$256 for the same period last year. The increase was primarily due to increases in securities trading expenses, conventions, dues and subscriptions, business tax costs, and office technology costs, offset by decreases in insurance costs.

Professional services for the six months ended June 30, 2014 totaled \$1,038, an increase of \$271, or 35%, over the \$767 recognized for the six months ended June 30, 2013. Of professional services, legal fees totaled \$383 for the six months ended June 30, 2014, an increase of \$102, or 36%, from \$281 incurred for the six months ended June 30, 2013. Investor and public relations fees incurred in the six months ended June 30, 2014 was \$461, an increase of \$97, or 27%, from \$364 incurred in the six months ended June 30, 2013. Accounting fees incurred in the six months ended June 30, 2014 and 2013 amounted to \$105 and \$93, respectively. Consulting fees and other professional fees totaled \$89 for the six months ended June 30, 2014, an increase of \$60, or 207%, from \$29 for the three months ended June 30, 2013. Other professional fees include human resources, finance and corporate consultants.

Net Loss. As a result of the foregoing, the net loss for the six months ended June 30, 2014 was \$11,208, compared to a net loss of 4,087 for the six months ended June 30, 2013.

Liquidity and Capital Resources (in thousands, except share data)

As of June 30, 2014, we had working capital of approximately \$42,445, comprised primarily of cash of \$43,870 and \$946 prepaid expenses, offset by \$1,518 of accounts payable, \$573 of accrued expenses and \$280 of promissory notes to related parties. A significant portion of the accounts payable and accrued expenses are due to work performed in relation to our BESTFIT trial. For the six months ended June 30, 2014 and 2013, we used approximately \$9,763 and \$2,123 of cash in operating activities, respectively, which represented cash outlays for research and development and general and administrative expenses in such periods. Increases in cash outlays principally resulted from manufacturing, non-clinical activity costs and clinical activity costs, regulatory costs, and payroll. For the six months ended June 30, 2014, net proceeds from financing activities were from the sale of our common stock of approximately \$40,654 and the exercise of warrants of \$4,889. In the comparable 2013 period, net proceeds from financing activities were comprised of related party advances of \$200 and the exercise of warrants of \$307, net of \$101 prepaid deferred offering costs. At June 30, 2014, we had cash of approximately \$43,870 compared to \$8,202 at December 31, 2013. Our cash is held in bank deposit accounts.

Cash used in investing activities for the six months ended June 30, 2014 was approximately \$107, reflecting purchase of equipment of \$35 and additions to restricted cash accounts of \$72, respectively. There was \$nil cash used in investing activities for the six months ended June 30, 2013.

January 2014 Public Offering

On January 24, 2014, we entered into an underwriting agreement with Roth Capital Partners, LLC (“Roth”), as representative of several underwriters (collectively, the “Underwriters”), relating to the issuance and sale of 2,898,550 shares of our common stock. The public offering price for each share of common stock was \$15.00.

Our net proceeds from the sale of the shares of common stock was approximately \$40,700, after deducting underwriting discounts and commissions and other offering expenses payable by us. We granted the Underwriters a 45-day option to purchase up to an additional 434,782 shares of common stock to cover over-allotments, if any. The offering closed on January 29, 2014 and the over-allotment option expired unexercised.

July 2014 Public Offering

On July 11, 2014, we entered into a placement agent agreement with Roth relating to the sale of 657,000 shares of our common stock in a registered direct public offering at a price of \$11.90 per share. The registered direct offering closed on July 16, 2014 and we received net proceeds of approximately \$7,200, after deducting placement agent fees and offering expenses of approximately \$600.

Future Liquidity Requirements

We expect to incur losses from operations for the near future. We expect to incur increasing research and development expenses, including expenses related to additional clinical trials. We expect that our general and administrative expenses will increase in the future as we expand our business development, add infrastructure and incur additional costs related to being a public company, including incremental audit fees, investor relations programs and increased professional services.

Our future capital requirements will depend on a number of factors, including the progress of our research and development of product candidates, the timing and outcome of regulatory approvals, the costs involved in preparing, filing, prosecuting, maintaining, defending and enforcing patent claims and other intellectual property rights, the status of competitive products, the availability of financing and our success in developing markets for our product candidates. We believe our existing cash is sufficient to fund our operating expenses and capital equipment requirements for at least the next 12 months.

We presently do not have any available credit, bank financing or other external sources of liquidity. Due to our history and historical operating losses, our operations have not been a source of liquidity. We may need to obtain additional capital in order to fund future research and development activities. Future financing may include the issuance of equity or debt securities, obtaining credit facilities, or other financing mechanisms. Even if we are able to raise the funds required, it is possible that we could incur unexpected costs and expenses, fail to collect significant amounts owed to us, or experience unexpected cash requirements that would force us to seek alternative financing. Furthermore, if we issue additional equity or debt securities, shareholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of existing holders of our common stock.

If additional financing is not available or is not available on acceptable terms, we may be required to delay, reduce the scope of or eliminate our research and development programs, reduce our commercialization efforts or obtain funds through arrangements with collaborative partners or others that may require us to relinquish rights to certain product candidates that we might otherwise seek to develop or commercialize independently.

Transactions with Related Parties (in thousands, except share data)

We previously entered into a consulting agreement with Lederman & Co., LLC (“Lederman & Co”), a company controlled by Dr. Seth Lederman, our Chief Executive Officer and Chairman of the Board. Total expenses paid under this agreement were \$nil and \$38 during the three and six month periods ended June 30, 2014, respectively, and \$63 and \$125 during the three and six month periods ended June 30, 2013, respectively. The agreement was terminated on February 11, 2014 and replaced with the employment agreement entered into on that date.

On July 31, 2013, we sold two promissory notes in the principal face amounts of \$150 and \$50 to Lederman & Co and Eli Lederman, respectively, in exchange for \$150 and \$50, respectively. On August 1, 2013, we sold a promissory note in the principal face amount of \$80 to Lederman & Co in exchange for \$80. The notes are payable on demand at any time after one year from issuance and bear no interest, and are included in current liabilities on the condensed consolidated balance sheets at June 30, 2014 and December 31, 2013. On July 31, 2014 and August 1, 2014 (subsequent to the financial statements), we repaid \$200 and \$80, respectively, the above described notes.

On March 18, 2014, Tonix Barbados entered into an asset purchase agreement (the “Starling Agreement”) with Starling Pharmaceuticals, Inc. (“Starling”) and an asset purchase agreement (the “Leder Agreement” and together with the Starling Agreement, the “Agreements”) with Leder Laboratories, Inc. (“Leder”). Seth Lederman, our Chairman and Chief Executive Officer, is the Chairman, CEO and majority owner (through majority-owned entities) of Starling and Leder.

Pursuant to the Starling Agreement, Tonix Barbados acquired from Starling rights to a United States patent application for radio- and chemo-protective agents and related intellectual property rights, in exchange for \$125 and 25,000 shares of our common stock valued at \$304 (\$12.15 per share).

Pursuant to the Leder Agreement, Tonix Barbados acquired from Leder rights to a United States patent application for novel smallpox vaccines and related intellectual property rights, in exchange for \$125 and 25,000 shares of our common stock valued at \$304 (\$12.15 per share).

Stock Compensation

2012 Incentive Stock Option Plan

On April 16, 2012, our stockholders approved the 2012 Incentive Stock Option Plan (the “2012 Plan”). The 2012 Plan provides for the issuance of options to purchase up to 200,000 shares of our common stock to officers, directors, employees and consultants of our company. Under the terms of the 2012 Plan, we may issue incentive stock options as defined by the Internal Revenue Code of 1986, as amended (the “Code”) to our employees and may also issue nonstatutory options to employees and others. Our board of directors (“Board of Directors”) determines the exercise price, vesting and expiration period of the grants under the 2012 Plan. However, the exercise price of an incentive stock option may not be less than 110% of fair value of the common stock at the date of the grant for a 10% or more shareholder and 100% of fair value for a grantee who is not a 10% shareholder. The fair value of the common stock is determined based on quoted market price or in absence of such quoted market price, by the Board of Directors in good faith. Additionally, the vesting period of the grants under the 2012 Plan may not be more than five years and expiration period not more than ten years. We reserved 200,000 shares of our common stock for future issuance under the terms of the 2012 Plan.

On May 9, 2012, 175,000 options had been granted under the 2012 Plan. Of such options, 25,000 were cancelled and 150,000 were outstanding at June 30, 2014 with an exercise price of \$30.00, a 10 year life and fair value of \$23.50.

On February 12, 2013, the 2012 Plan was amended and restated to increase the number of shares reserved under the plan to 550,000. On February 12, 2013, 226,500 options were granted under the 2012 Plan (all of which were outstanding at June 30, 2014) with an exercise price of \$10.20, a 10 year life and fair value of \$7.83.

On February 11, 2014, 173,500 options were granted under the 2012 Plan (all of which were outstanding at June 30, 2014) with an exercise price of \$15.88, a 10 year life and fair value of \$11.52.

Stock options granted under the 2012 Plan vest 1/3rd 12 months from the date of grant and 1/36th each month thereafter for 24 months and expire ten years from the date of grant.

2014 Incentive Stock Plan

On June 9, 2014, our stockholders approved the Tonix Pharmaceuticals Holdings Corp. 2014 Stock Incentive Plan (the “2014 Plan”). Under the terms of the 2014 Plan, we may issue (1) stock options (incentive and nonstatutory), (2) restricted stock, (3) stock appreciation rights, or SARs, (4) restricted stock units, or RSUs, (5) other stock-based awards, and (6) cash-based awards. The 2014 Plan provides for the issuance of up to 1,800,000 shares of common stock, provided, however, that, of the aggregate number of 2014 Plan shares authorized, no more than 200,000 of such shares may be issued pursuant to stock-settled awards other than options (that is, restricted stock, RSUs, SARs, performance awards, other stock-based awards and dividend equivalent awards, in each case to the extent settled in shares of common stock). The Board of Directors determines the exercise price, vesting and expiration period of the grants under the 2014 Plan. However, the exercise price of an incentive stock option may not be less than 110% of fair value of the common stock at the date of the grant for a 10% or more shareholder and 100% of fair value for a grantee who is not a 10% shareholder. The fair value of the common stock is determined based on quoted market price or in absence of such quoted market price, by the Board of Directors in good faith. Additionally, the vesting period of the grants under the 2014 Plan may not be more than five years and expiration period not more than ten years. We reserved 1,800,000 shares of our common stock for future issuance under the terms of the 2014 Plan.

On June 17, 2014, 355,100 options were granted under the 2014 Plan (all of which were outstanding at June 30, 2014) with an exercise price of \$9.87, a 10 year life and fair value of \$8.76.

Stock options granted under the 2014 Plan vest 1/3rd 12 months from the date of grant and 1/36th each month thereafter for 24 months and expire ten years from the date of grant.

2014 Employee Stock Purchase Plan

On June 9, 2014, our stockholders approved the Tonix Pharmaceuticals Holdings Corp. 2014 Employee Stock Purchase Plan (the “2014 ESPP”). The 2014 ESPP allows eligible employees to purchase up to an aggregate of 300,000 shares of our common stock. Under the 2014 ESPP, on the first day of each offering period, each eligible employee for that offering period has the option to enroll for that offering period, which allows the eligible employees to purchase shares of our common stock at the end of the offering period. Each participant will be permitted to purchase a number of shares determined by dividing the employee’s accumulated payroll deductions for the offering period by the applicable purchase price, which is equal to 85 percent of the fair market value of our common stock at the beginning or end of each offering period, whichever is less. A participant must designate in his or her enrollment package the percentage (if any) of compensation to be deducted during that offering period for the purchase of stock under the 2014 ESPP, subject to the statutory limit under the Code. As of June 30, 2014, there were 300,000 shares available for future issuance under the 2014 ESPP.

Lease Commitments

On February 11, 2014, we entered into a lease amendment and expansion agreement, whereby we agreed to lease additional premises for office space, commencing May 1, 2014 and expiring on April 30, 2019. In connection therewith, the original letter of credit was increased by \$72,354 to \$132,417.

On April 28, 2014, we entered into a lease for approximately 3,578 square feet of office space in San Jose, California whereby we agreed to lease premises, commencing August 1, 2014 and expiring on October 31, 2018 (51 months). In connection therewith, we paid a security deposit of \$44,546.

Future minimum lease payments under these two agreements are as follows:

<u>Year Ending December 31,</u>	
2014	\$ 173,206
2015	\$ 420,120
2016	\$ 445,890
2017	\$ 459,295
2018 and thereafter	\$ 540,782
	\$ 2,039,293

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities and expenses. We evaluate our estimates and judgments on an ongoing basis. We base our estimates on historical experience and on assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

Research and Development. Tonix outsources its research and development efforts and expenses related costs as incurred, including the cost of manufacturing product for testing, licensing fees and costs associated with planning and conducting clinical trials. The value ascribed to patents and other intellectual property acquired was expensed as research and development costs, as it related to particular research and development projects and had no alternative future uses.

Stock Based Compensation. All stock-based payments to employees and to nonemployee directors for their services as directors consisted of grants of restricted stock and stock options, which are measured at fair value on the grant date and recognized in the consolidated statements of operations as compensation expense over the relevant vesting period. Restricted stock payments to nonemployees are recognized as an expense over the period of performance. Such payments are measured at fair value at the earlier of the date a performance commitment is reached or the date performance is completed. In addition, for awards that vest immediately and are nonforfeitable, the measurement date is the date the award is issued.

Income Taxes. Deferred income tax assets and liabilities are determined based on the estimated future tax effects of net operating loss and credit carryforwards and temporary differences between the tax basis of assets and liabilities and their respective financial reporting amounts measured at the current enacted tax rates. We record an estimated valuation allowance on our deferred income tax assets if it is not more likely than not that these deferred income tax assets will be realized. We recognize a tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by taxing authorities, based on the technical merits of the position. The tax benefits recognized in the consolidated financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

Recent Accounting Pronouncements Adopted and Issued

During the quarter ended June 30, 2014, we adopted Accounting Standards Update (ASU) No. 2014-10, “Development Stage Entities (Topic 915): Elimination of Certain Financial Reporting Requirements, Including an Amendment to Variable Interest Entities Guidance in Topic 810, Consolidation”, which was issued in June 2014. The ASU is effective for annual reporting periods beginning after December 15, 2014, (and interim periods therein) with early adoption allowed. The amendments in this ASU eliminate the concept of a development stage entity from GAAP and remove the related incremental financial reporting requirements. Accordingly, we are no longer presenting cumulative inception-to-date along with our current period amounts in our statements of operations and cash flows.

There were various other updates recently issued, most of which represented technical corrections to the accounting literature or application to specific industries and are not expected to have a material impact on our consolidated financial position, results of operations or cash flows.

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not required under Regulation S-K for “smaller reporting companies.”

ITEM 4 - CONTROLS AND PROCEDURES

a) Evaluation of disclosure controls and procedures.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934 as of the end of the period covered by this Quarterly Report on Form 10-Q. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Based on our evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2014, our disclosure controls and procedures are designed at a reasonable assurance level and are effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

(b) Changes in internal control over financial reporting.

There were no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

We are currently not a party to any material legal proceedings or claims.

Item 1A. Risk Factors

Not required under Regulation S-K for “smaller reporting companies.”

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On April 17, 2014, we issued 1,800 shares of common stock to one investor upon the exercise of warrants issued August 14, 2013 (“Warrants”) for proceeds of \$7,650. The shares were issued pursuant to the exemption from registration provided by Section 4(a)(2) of the Securities Act of 1933, as amended.

On April 24, 2014, we issued an aggregate of 23,529 shares of common stock to two investors upon the exercise of Warrants for aggregate proceeds of approximately \$99,998.25. The shares were issued pursuant to the exemption from registration provided by Section 4(a)(2) of the Securities Act of 1933, as amended.

On April 25, 2014, we issued an aggregate of 1,500 shares of common stock to three investors upon the exercise of Warrants for proceeds of \$6,375. The shares were issued pursuant to the exemption from registration provided by Section 4(a)(2) of the Securities Act of 1933, as amended.

On June 6, 2014, we issued an aggregate of 900 shares of common stock to three investors upon the exercise of Warrants for proceeds of \$3,825. The shares were issued pursuant to the exemption from registration provided by Section 4(a)(2) of the Securities Act of 1933, as amended.

On June 9, 2014, we issued an aggregate of 3,000 shares of common stock to three investors upon the exercise of Warrants for proceeds of \$12,750. The shares were issued pursuant to the exemption from registration provided by Section 4(a)(2) of the Securities Act of 1933, as amended.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.

Item 6. Exhibits

31.01	Certification of Chief Executive Officer pursuant to Exchange Act Rules 13a-14(a) and 15d-14(a), as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.02	Certification of Chief Financial Officer pursuant to Exchange Act Rules 13a-14(a) and 15d-14(a), as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.01	Certifications of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

Principal Accounting Officer)

CERTIFICATION

I, Seth Lederman, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Tonix Pharmaceuticals Holding Corp.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonable likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls over financial reporting.
